

FLEX-BACK™ Panel

Figure 1: The FLEX-BACK Panel can be installed as a bottom and an intermediate panel

The FLEX-BACK Panel reduces costly door damage costs with its flexible fiberglass frame and high impact polymer skin. The insulated panel also acts as an additional energy cost saver.

Figure 2: The panel flexes on impact but returns to normal operating position

Design Highlights

- Flexible fiberglass frame gives panel longevity
- Helps reduce door maintenance
- Provides an exceptional thermal seal
- Installs easily using standard door hardware
- Heavy-duty easy grip handle comes standard
- Seals against tongue and groove or ship/lap door panels
- This product carries a (2) year limited warranty with APS Resource

Technical Specifications

Door Sizes	8'2", 9'2", 10'2", and 12'2"
Construction Material	Thick, 1 3/4" fiberglass
	High impact polymer skin
